## ABOUT US

The Hungarian ROLLA company group has been an active player of the European market of doors and windows for over 25 years.

In a joint effort the member companies offer to the customers a complete and mutually harmonized and supplementary package of products and services ranging from the designing, through preparation, assessment and material deliveries up to construction/installation.

## FACADE STRUCTURES

In order to ensure the desired result, the staff of our company makes efforts to produce facades with the highest possible standards using the multitude of available materials as suited to the requirements of the customers, and in compliance with the relevant statutory regulations.

**ROLLA HEADQUARTER**

## FIRST CLASS MATERIALS

Our objective is to fully meet the needs of our customers by using first class materials. The most important part of the related efforts include the carefully executed engineering and design works, that allow the provision of added value to the customers, by which the used base materials are formed into products, so that the customers could have ROLLA facades after eventually placing an order.
